

## CERTIFICATE OF ANALYSIS

### Fenbendazole 74 mg & Ivermectin 4 mg Capsules

| Product / Batch Information | Details                   |
|-----------------------------|---------------------------|
| Product Name                | Purely Cleanse            |
| Generic Name                | Fenbendazole & Ivermectin |
| Manufacturer / Prepared For | Purely Prepared Patriot   |
| Lot No.                     | 102202512                 |
| Brand                       | Purely Prepared Patriot   |
| Date of Manufacture         | 01/2026                   |
| Date of Receipt             | 17/01/2026                |
| Date of Expiry              | 12/2029                   |
| Date of Analysis            | 22/01/2026                |
| Batch Size                  | 3,000,000 capsules        |
| Sample Quantity             | 100 capsules              |

| Test / Parameter                      | Specification                                                                                                                       | Analysed Result |
|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| Description                           | White powder                                                                                                                        | White powder    |
| Identification — Fenbendazole by HPLC | The retention time of the major peak of the Sample solution corresponds to that of the Standard solution, as obtained in the Assay. | Complies        |
| Identification — Ivermectin by HPLC   | Retention time of H2B1a and H2B1b peaks corresponds to the standard preparation.                                                    | Complies        |
| Assay — Fenbendazole                  | NLT 90% and NMT 110% of labelled amount                                                                                             | 74.844 mg/cap   |
| Assay — Ivermectin                    | NLT 90% and NMT 110% of labelled amount                                                                                             | 3.838 mg/cap    |
| Total Aerobic Microbial Count (TAMC)  | NMT 1000 CFU/g                                                                                                                      | 25 CFU/g        |
| Total Yeast & Mould Count (TYMC)      | NMT 100 CFU/g                                                                                                                       | Absent/gm       |
| Escherichia coli (E. coli)            | Absent in 1 g                                                                                                                       | Absent/gm       |
| Staphylococcus aureus                 | Absent in 1 g                                                                                                                       | Absent/gm       |
| Pseudomonas aeruginosa                | Absent in 1 g                                                                                                                       | Absent/gm       |
| Salmonella species                    | Absent in 25 g                                                                                                                      | Absent/gm       |

Active ingredients in one capsule: Fenbendazole 74 mg + Ivermectin 4 mg.
